Aims and Values

At Bridge Hall Primary School, we truly believe that **Every Child Matters and Every Day Counts**. Our staff are committed to ensure that all children are safe, have excellent social and emotional skills and fulfil their potential in all areas. Our curriculum is designed to foster resilience, encourage independence and prepare all children for the next stage of their education. Our core values support this ensuring we focus on **Inclusion, Community** and **Excellence**.

Our Curriculum

Our curriculum is designed with inspirational individuals and values at the core of all we do. Taking account of the backgrounds of our pupils, life experiences and culture has helped us to design a curriculum underpinned by inspirational people and three key values: Inclusion, Excellence and Community. Our curriculum and approach to learning have been organised with the children at the centre, so their experience at Bridge Hall is of a rich, rewarding education where all children achieve and succeed. We want all children to leave Bridge Hall with the skills and attributes needed to enable them to be successful in the next stage of their education.

Curriculum Design

Our curriculum has been carefully planned. We keep an appropriate focus on the core subjects, English, Maths and Science, whilst also ensuring that all children benefit from a rich and diverse range of topics. Through this, we extend children's learning beyond the requirements of the National Curriculum. We tailor our curriculum to ensure that children are not merely covering content, but also achieving depth in their learning, which enables them to transfer their skills and understanding to all areas of the curriculum and beyond.
